Summary

Senior Product Designer with 7 years of experience leading 0-to-1 and scale-stage products across B2B SaaS, enterprise platforms, and complex data-heavy ecosystems. Specialized in designing intuitive dashboards, reporting interfaces, and unifying multi-platform experiences across web and mobile. Proven track record of framing problems through product discovery and shipping scalable solutions, powered by data-driven insights and AI-assisted workflows.

Experience

Freelancer (Contract) Via VIVA Innovation — Client: Samsung Kangbuk Hospital	PM & Product Designer Oct 2025 – Nov 2025 - Led the end-to-end discovery and launch of an enterprise mobile health checkup booking service serving ~250K annual users. - Acted in dual roles as PM and Product Designer, collaborating with Samsung SDS and hospital stakeholders to translate complex requirements into seamless web/mobile user flows. - Owned service planning, UX/UI design, wireframing, and production-ready handoff.
VIVA Innovation Healthcare SaaS Platform (B2B & B2C) Seoul, South Korea	Product Design Lead Mar 2022– May 2025 - Scaled a multi-platform ecosystem (B2C Mobile + B2B SaaS) from MVP to Series B (\$15M+). - Designed data-heavy B2B dashboards, hospital CRM, and operational reporting tools, making complex data clear and accessible for non-expert users. - Designed an enterprise capacity management system that reduced cancellation rates by 3x and cut operational workload. - Led product discovery and unified user flows across web and mobile, driving a 39% increase in mobile booking conversion. - Led end-to-end design for 'Kindoc AI' generative chatbot and post-treatment Patient Management Systems (PMS). - Mentored a team of 2 junior designers and 1 part-time designer.
	UI/UX Designer (Founding Team Member) Nov 2018 – Feb 2022 - Led end-to-end UX/UI design and information architecture for Doctrue (telemedicine tablet app) without a dedicated PM, shipping to production. - Built and documented a scalable B2B2C design system, standardizing components across platforms and reducing developer handoff time by 3x. - Refactored core mobile applications, establishing design system foundations and Figma-based team workflows.
	Enterprise Partnerships Samsung Kangbuk Hospital — Designed an enterprise-scale checkup reservation system (Admin & Mobile) supporting 250K users annually. LG Electronics — Designed a bio-data integrated mobile health platform connected to Bluetooth devices.

Education	Ewha Womans University College of Fine Arts	Mar 2011 - Aug 2016
	BFA in Fiber Arts	
	Korea Animation Highschool	Mar 2008- Feb 2011
	Major in Animation Student Animation Project [Video Link]	

Certification	Certified Colorist Engineer	May 2016
	Human Resources Development Service of Korea
